The Agile Insights Software
Design the future simply agile.

quantilope has a product which turns the market research industry upside down. An automated self-service platform based on newest technologies delivers professional consumer insights fast as lightning. With the help of this solution, we have already delighted various great brands. Together with established investors, we are ready for the next step and are searching for motivated and excellent recruits who want to become part of our success story. Right now we are looking for a

DevOps Engineer (m/f/x)

As a DevOps Engineer (m/f/x) you'll be working with amazing new technologies in a growing team. Having advanced knowledge in Linux, Networking and Software Containerization, you have the mission to make our software reliable, available and performant.

YOUR CHALLENGE

- You will be designing a set of agile, constantly evolving, container-centered, secure infrastructures.
- You'll be enabling development teams to work in the most efficient possible way
- You'll be designing monitoring dashboards and alerting policies on app, network and infrastructure level
- You'll be managing redundant, critical infrastructures with very high availability requirements.

YOUR PROFILE

- You love Docker, you cannot imagine deploying anything that is not a container and you have intermediate grasp of NodeJS/JavaScript.
- You've configured all sorts of secure web servers and reverse proxies and you're familiar with Continuous Integration systems for automating testing anf building of software artifacts.
- Your terminal feels like home to you. And you don't run anything in it unless you're quite sure of what a command will do.
- You're familiar with Linux and some of it's intermediate concepts - such as systemd, networking basics, etc. You are flexible in terms of which distributions you can work with.
- You feel comfortable dealing with different Cloud providers, such as AWS, Digital Ocean, etc. and know how SSH works and how to use it.

WHAT WE OFFER

- Great company culture with great openness, drive and fun
- Loft office with fresh fruit, drinks, and coffee in the very heart of Hamburg
- Regular exchange with other developers at Meetups
- Awesome international and multicultural team mates
- Collaborative and empowering environment to develop yourself
- Work with the devices you are most comfortable with
- Regular team events and company retreats
- HVV ProfiTicket available
